

SATHISH M

Full Stack Developer | MERN Stack | Software Engineer

+91-7395858944 | sathishm8535@gmail.com | linkedin.com/in/m-sathish18 | github.com/sathishm8535-coder | Thoothukudi, Tamil Nadu

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with end-to-end ownership of 5+ production-grade web applications serving 1,000+ users, built on the MERN stack (MongoDB, Express.js, React.js, Node.js). Delivered real-time, event-driven systems (Socket.io, WebSockets), scalable RESTful APIs with JWT-based authentication, and CI/CD pipelines on Vercel — reducing deployment cycles to under 2 minutes. Proficient in TypeScript, Next.js (SSR/SSG), Redux Toolkit, Tailwind CSS, and Agile/Scrum workflows. Pursuing a Software Engineer or Full Stack Developer role at a product-driven IT organization to build high-performance, user-centric solutions at scale.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
Frontend:	React.js, Next.js (SSR/SSG), Redux Toolkit, Context API, Tailwind CSS, Bootstrap, Responsive Web Design
Backend:	Node.js, Express.js, RESTful API Design, WebSockets (Socket.io), Middleware Architecture, Input Validation, Error Handling
Databases:	MongoDB (Mongoose ODM), Firebase Firestore (Real-time), IBM Db2 (SQL/Relational)
DevOps & Tools:	Git, GitHub, Vercel (CI/CD), Render, VS Code, npm, Environment Configuration, Debugging
Auth & Integration:	JWT Authentication, Firebase Auth, Google Sheets API, Axios, Fetch API, EmailJS, REST API Integration
CS Fundamentals:	Data Structures & Algorithms, OOP, System Design (Basics), Agile/Scrum, Code Review, Performance Optimization

PROJECTS

SAC Net Exam – Online Examination Portal

React.js | Next.js | TypeScript | Node.js | Express.js | MongoDB | REST API | Tailwind CSS | Vercel

GitHub: github.com/sathishm8535-coder | Live: sac-net-exam.vercel.app/register

- Architected and deployed a production-grade online examination portal for Sadakathullah Appa College, digitizing the full exam lifecycle — registration, scheduling, and result delivery — for 1,000+ active users.
- Engineered a type-safe, multi-step registration and exam workflow in React.js + TypeScript with real-time client-side and server-side validation, eliminating invalid form submissions entirely.
- Built 10+ RESTful API endpoints in Node.js/Express.js covering user management, exam CRUD, and result pipelines — layered with error handling and input sanitization to ensure data integrity.
- Designed a fully responsive, component-based UI in Tailwind CSS achieving 100% layout fidelity across mobile, tablet, and desktop — zero media query failures reported.
- Configured automated CI/CD pipeline on Vercel triggered on every GitHub push, cutting deployment cycle time to under 2 minutes.

IPL Auction Multiplayer Game – Real-Time Bidding Platform

Node.js | Express.js | Socket.io | JavaScript | HTML5 | CSS3 | Vercel

GitHub: github.com/sathishm8535-coder | Live: ipl-two-red.vercel.app

- Developed a low-latency multiplayer bidding platform using Node.js, Express.js, and WebSockets (Socket.io), achieving sub-100ms event propagation across concurrent auction sessions.
- Built a dynamic room-management system with unique session IDs per auction, handling concurrent player lifecycle events (join, leave, disconnect) with zero state corruption under load.
- Implemented conflict-free game state synchronization — managing bidding turns, auction-lock logic, and duplicate-player prevention — ensuring consistency across all active WebSocket clients.
- Architected an extensible Express.js backend broadcasting real-time events to multiple simultaneous rooms without measurable performance degradation.

Sadak Sports Register Portal – Institutional Event Platform

React.js | Next.js | TypeScript | Tailwind CSS | Node.js | REST API | Vercel

GitHub: github.com/sathishm8535-coder | Live: sac-murex.vercel.app

- Delivered a full-stack sports event registration system serving 1,000+ students and staff, replacing a fully manual process with an end-to-end digitized workflow — reducing registration errors to zero.
- Built dynamic multi-event selection with multi-step form validation in React.js + TypeScript, eliminating duplicate registrations through enforced server-side constraints.
- Developed a reusable modular component library in Tailwind CSS, enforcing consistent design tokens, spacing, and responsive breakpoints across the entire application.
- Integrated a decoupled RESTful API layer in Node.js for event management and registration ingestion, enabling independent scaling of frontend and backend services.

MSC Paint Service – Corporate Business Website

HTML5 | CSS3 | JavaScript | Responsive Design | Vercel

GitHub: github.com/sathishm8535-coder/Mscpaint-Service | Live: mscpaint-service.vercel.app

- Built a professional multi-section corporate website (Home, Services, About, Contact) with interactive call-to-action elements and animated navigation — enhancing brand visibility and customer reach.
- Optimized CSS architecture by eliminating redundant rules and applying adaptive layout techniques, reducing stylesheet size and ensuring consistent cross-browser rendering across Chrome, Firefox, Safari, and Edge.
- Deployed production build on Vercel with GitHub version control; maintained zero downtime since initial deployment.

Personal Portfolio Website

HTML5 | CSS3 | Vanilla JavaScript (ES6+) | Responsive Web Design | Vercel

Live: sathish-portfolio-seven.vercel.app

- Built a performance-optimized, fully responsive portfolio with 5+ structured sections using semantic HTML5/CSS3 — zero-framework overhead yielding fast initial load times.
- Implemented dark/light theme toggle with localStorage persistence, dynamic sticky navigation, and smooth-scroll UX — measurably improving session engagement and accessibility.

INTERNSHIP

Frontend Developer Intern — VSoft Solutions, Tirunelveli, Tamil Nadu

- Contributed to production UI development by building and optimizing responsive React.js components consumed by end users — operating within professional Agile/Scrum delivery cycles.
- Engineered reusable, state-driven interface components in React.js, JavaScript (ES6+), HTML5, and CSS3 following component-based architecture patterns standard in enterprise codebases.
- Integrated RESTful APIs via Axios, managing asynchronous data flows, error boundaries, and client-server communication within a live product environment.
- Participated in code reviews, sprint planning, and iterative delivery — consistently meeting product deadlines while debugging cross-browser UI inconsistencies.

EDUCATION

B.Sc. Information Technology — Sadakathullah Appa College, Tamil Nadu	2023 – 2026 (Expected) CGPA: 7.84
Higher Secondary Certificate (HSC) — LK Higher Secondary School, Kayalpatinam	2023 62%

ACHIEVEMENTS & ACTIVITIES

- Sole developer, architect, and deployer of 5+ production-grade web applications — demonstrating complete SDLC ownership from system design through CI/CD.
- Elected Student Representative (2024–2025), Sadakathullah Appa College — led cross-functional coordination of academic, technical, and cultural events for the IT department.
- Maintained a consistent, structured GitHub contribution history across all projects — enforcing atomic commits, feature-branch strategies, and pull-request reviews aligned with professional engineering standards.
